

My Testimonial

Since 6 years I am a professional topsorter bike-racing however al these years I am suffering with chronic injuries which I call – jumping injuries-, sometimes it is my knee that blocks, then my back hurts or my neck and ankles becomes stiff. On top I have a chronic low level of EPO value. I am under permanent treatment of our sports fysiotherapist and team doctor. For every match I need to stay at height, and come back as late as possible to carry out my match. It costed me a fortune but also a lot of energy all this extra travelling. That often I thought I stop because why I do have this and others not? Something has to be going wrong in my body? My team doctor could not tell me more than ‘this is you, you cannot do more than you do now’.

I have searched and searched on internet but did not find a solution. Untill I had a horse voice and needed to go to a specialist, otolaryngeal, while waiting in the waiting room I spoke with a another person who came back for a check-up with her son and she told me a remarkable story. Her son had tubes in his ears for chronic Otitis Media for many years until she heard about Medisynx clinics and laboratory, he go tan individual diet and only 2 acupuncture treatments and was cured, his tubes were gone and never ever he suffered from Otitis Media anymore and also other manifestations are gone as horse voice, always muscle pains even with writing, and he has better blood values since then too. She explained all about incompatible food that causes chronic inflammations by your immunesystem and causes al kinds of manifestations, but that no doctor wants to look to your incompatibilities, as they consider certain foods as healthy for everybody. However her son could not have many vegetables, fruits, species and seafood. All he loved to eat, but made him ill. I understood his story very well, and instantly knew that must be my problem too. I was only engaged by counting

calories, fats and proteins. She gave me the Medisynx website and I made an appointment right a way. At Medisynx they informed me comprehensively about how you become ill due to food, what is the treatment about, what is BASIS Plus Test and why I also need to have 2 acupuncture treatments to clean up my lymphatic system to reset the homeostasis (balance) of my immunesystem. . All so logic!

Well I am so grateful to meet this woman with her son, and that she was so nice to share their story with me, otherwise I would never ever heard about it, that's no coincidence.

At first acupuncture treatment I got many needles from top to toe, but after I felt so incredible like I was reborned. My body and head felt so clean, so light, my voice was not horse anymore, my knees, back and knees felt super really as new and felt a lot of energy. Wow if this feeling can stay forever, I was so happy.

They explained to me that in case of take in incompatibilities your cells will get damaged sooner, so I degenerate sooner then I can regenerate these cells and tissues. That is why I do not have enough stemmcells to make red blood cells and thus not enough EPO. Cause with stemmcells it is the same as with money – you can only spend it once, so you need to spend it to what is really necessary-. Sooo logic!

And so was it, after 3 weeks I felt my condition improved rapidly, blood samples showed my EPO value raised at sealevel, where I normally needed to go at height-trainings. My team doctor asked me 'what are you doing' and I told him about my special diet alone, as I know he is against acupuncture, he does not want to hear anything of acupuncture. Maybe later.

Since my first treatment I have no more injuries or recover fast and do need my fysiotherapy anymore, he said your body and muscles do feel so different, so flexible. I explained al lto him and he was not suposed, as he siad well I have heard about it, but may not talk

about it, as our doctors and sponsors forbid it. Probably afraid for their jobs, unfortunately this is how it goes.

Further I noticed many more changes, some of them I thought were normal, like sleeping -in, even night before a match I sleep perfectly, no more restlessness in bed, no more urinating in the night (nocturia) getting up fresh and fit, never any headache anymore, and needed less strenght of my glasses, they say soon you are able to see even without glasses. No more tinnitus in my ears, I always heard a noise of a rushing sea (ssssss), my toenail lost its mycose (mould) and is almost as new. Well to much to meantion, unbelievable isnt´it? I always thought that our medical team knows all, that only they have knowledge about the best food for topsporters. Well no though.

My achievements are magnificent, went from subtop to top and have super times at clock and I can even train harder and more intensively cause I have more energy, so yes I go for the TOP for a golden medal.

Doctor Vink who developped this treatment she is a real Topper, as it was really not easy to go upstream and she experienced a lot of resistance and derisive laughter of her colleagues and governments, but well they are probably jealous, beacuse who can be against an effective sustainable curative and preventive treatment???

To all sporters I would like to tell, take my results as serious.

Niels, my alias as I do not want to get problems with my sponsors.
